ICSE, the IEEE/ACM International Conference on Software Engineering, is the premier software engineering conference. Since 1975, ICSE provides a forum where researchers, practitioners, and educators gather together to present and discuss the most recent innovations, trends, experiences and issues in the field of software engineering.

The 43rd ICSE edition will be held in Madrid, Spain. As the center of a region with nearly 7M inhabitants, and the main communication hub between South-America and Europe, Madrid is a vibrant city from the social, business, and tourist perspectives. The city leads Spanish R&D, hosting companies and organizations specialized in activities such as IT, electronics, nuclear, weaponry, biochemistry, aerospace, railways or scientific equipment. And when the job is done, Madrid offers plenty of leisure options, from 3-star Michelin restaurants to some of the best art museums in the world.

The preparations for ICSE 2021 have already started. We have assembled a skilled and capable organization team. The conference venue (NH Collection Eurobuilding Hotel) has been selected already. The program (technical and social) is becoming clearer progressively. But above all, we need you! Please block these dates in your agenda: May 23-29, 2021.
